

Uninsured? Have Medi-Cal, but no regular doctor? Medi-Nurse can help.

California has launched an advice line that can connect you with a nurse, day or night, to talk about COVID-19 symptoms and help connect you with local resources in your area. These medical professionals are available 24 hours a day, 7 days a week.

Who is this line for?

If you don't have health care coverage, or you have Medi-Cal but don't have a regular doctor, California's new nurse advice line can help.

Call the Medi-Nurse line: 1-877-409-9052

The Medi-Nurse line can help with many questions:

- » Helping you understand whether your symptoms might be COVID-19 related, and whether you need to self-isolate and employ home self-care techniques, or whether your individual symptoms mean you should see a health care provider to get COVID-19 testing and/or treatment.

- » Providing you with information in your area, such as contact information for county offices or other county-level resources near you, particularly if you need to see a doctor for testing/treatment, or want to apply for health insurance.

California has made medically necessary COVID-19 testing free

Medically necessary COVID-19 testing is free in California, even for people who don't have insurance, **regardless of documentation status**. The Medi-Nurse line can help to connect you with resources, particularly if you need to see a doctor for testing and treatment, or want to apply for health insurance.

Medi-Nurse provides services in multiple languages, with steps in place that allow callers to access interpreters, as needed.

If you have a regular doctor or a health plan, **call them first**. If you don't, the Medi-Nurse line can help!

The Medi-Nurse line is available around the clock, 7 days a week.
